

FLOOD GRANT PROJECTS

Morgan County received a National Emergency Grant (NEG) that was for flood and storm damage that occurred in the spring of 2011. The NEG is funded by the Department of Labor; they in turn award the states that are affected by the emergency. Morgan County grant is run through Job's and Family Services Workforce Development office.

The crew is comprised of dislocated workers that live in the county. Projects have been identified in the Village through our Project Manager and the Village Administrator. Our projects started in the Village in October of 2011 and periodically we have done projects in conjunction with the Village thru November of 2012.

We still have pending projects throughout the Village and hope to continue throughout 2013.

The following pages will have location of project and before and after project pictures.

Project Description

Village of McConnellsville behind Little Dog Deli
removal of trash and debris restricting water flow
